

Printing and Converting

Production on a whole new level!

TouchKraft® Deck Control

Designed to replace the Olympia 6-color printing press deck system, the *TouchKraft* system integrates into the existing 24-axis Berger-Lahr stepping motor drive system.

System utilizes existing motors and drivers and provides new modules and operator interface resulting in superior performance and ease of operation.

Control modules fit into existing rack mounts and are fully expandable beyond the standard 24-axis system.

Deck Control

- 24-Axis system provides control of 6 (six) Analox and print deck stations, including Deck In/ Deck Out control.
- Allows deck stations to run independently, providing greater flexibility during printing.
- Features Auto-Interlock function for coordinated deck movement.
- Utilizes existing Deck In/ Deck out selector switches.

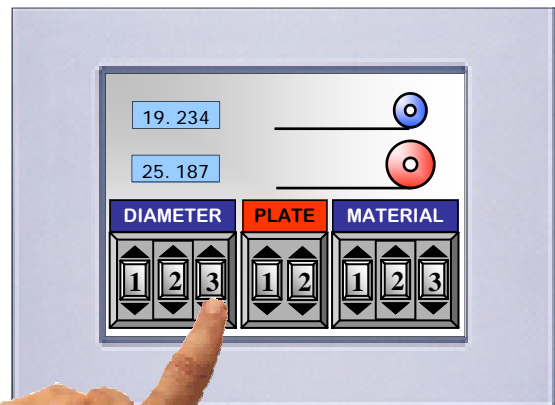

Interface

- 10" Color Touchscreen
- Mounted on 6' adjustable pendant arm.
- NEMA 12 (NEMA 4 Available)

Material Specification

- Parameters for both paper and plastic materials
- Virtual Thumbwheel interface allows operator to "Dial-In" material thickness quickly and easily.

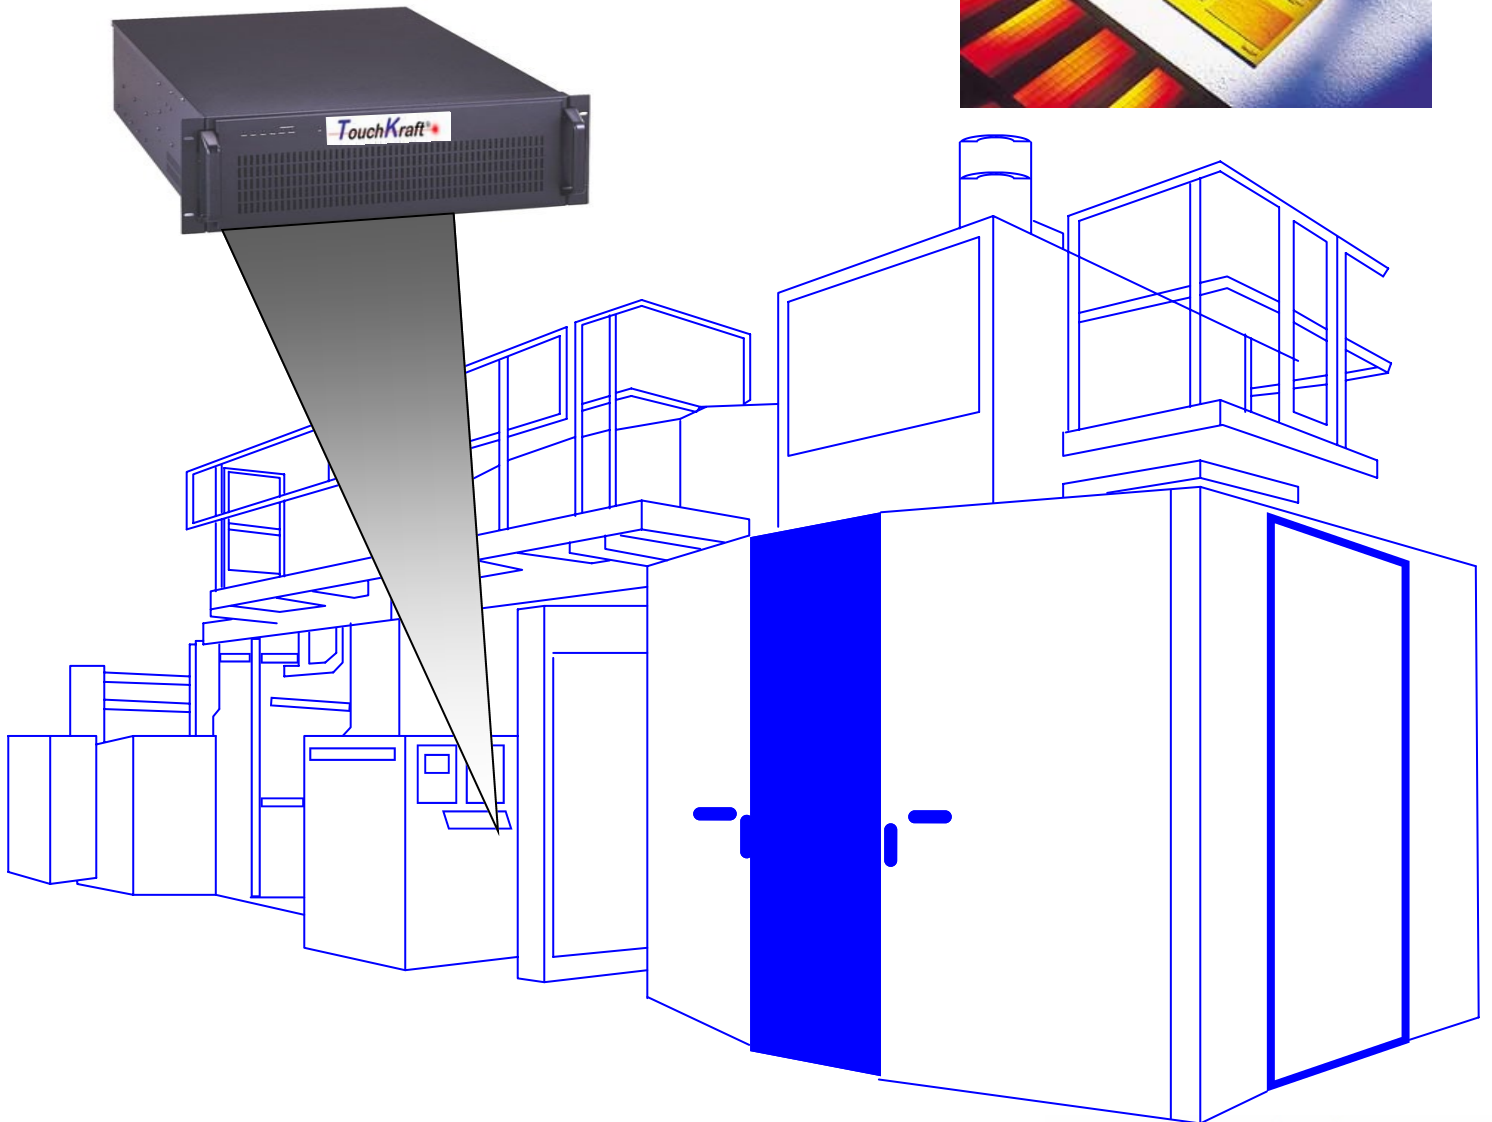

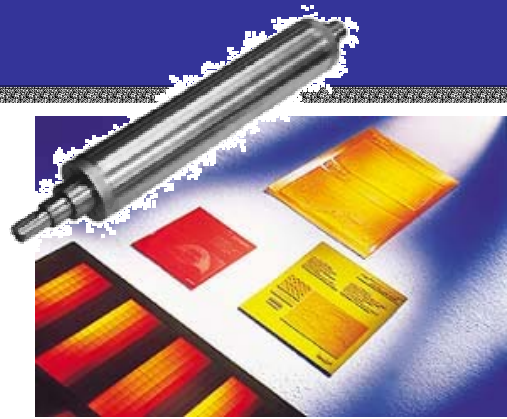

Software

- Powerful, user-friendly design is easy to navigate and operate.
- Written in high-level language for rapid processing.
- Displays:
 - Input parameters
 - Deck position and movements

Press Component Selection

- Define print cylinder diameter and plate thickness by virtual thumbwheel in seconds!

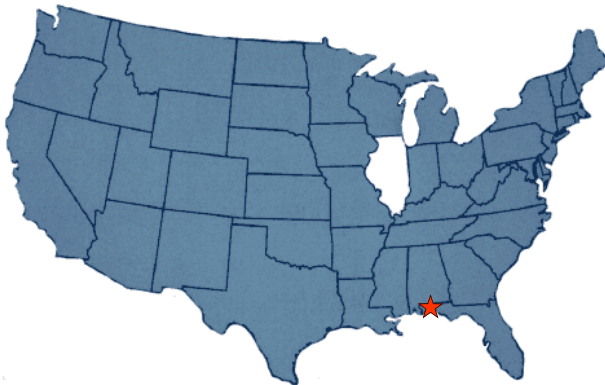

KRAFTRONICS

Why Krafronics, Inc?

- Over 20 years of experience in the converting industry.
- Technical support, onsite trouble shooting and spare parts delivery provided 24 hours a day.
- Decreased downtime and increased production by using Krafronics, Inc. registration, drive and control solutions.
- Reduced costs and maintenance through DC to AC Vector conversions.
- Krafronics engineers specialize in
 - AC/DC drives application
 - PLC design and configuration
 - System integration across a wide variety of platforms and processes
- Fabrication
 - UL listed Panel Shop
 - Auto Cad design team
 - Onsite testing facility
